GAZ-66 SMOKE-GENERATING EXERCISE AT SEVEROMORSK, LENINGRAD MILITARY DISTRICT, USSR (S)

1. (S/D) A smokescreen exercise (Figure 1) using a GAZ-66 smoke-generating vehicle was observed in a borrow pit (Figure 2) located at 69-01-20N 033-38-00E, approximately 1,160 meters northwest of [REDACTED], USSR, on imagery of [REDACTED]

[REDACTED] Equipment observed included five GAZ-66 smoke-generating vehicles, one probable ARS-12/-14 decontamination vehicle, two cargo trucks, one van-bodied truck, three single-axle trailers, and ten general-purpose tents.

2. (S/D) The GAZ-66 smoke-generating vehicle (Figure 3) has been seen at numerous military facilities throughout the Soviet Union; however, it had not been observed in operation. It has been seen at naval chemical services depots, chemical warfare storage depots, and at division-level ground forces storage depots.

3. (S/D) Personnel moving near the GAZ-66 smoke-generating vehicles appeared to be wearing highly reflective or light-toned protective clothing/headgear. This may indicate that the exercise involved a combination of smoke and chemical warfare agents or the simulation of the use of those agents.

(S) Comments and queries regarding this report are welcome. They may be directed to [REDACTED]
